- (2) For the purposes of this Act, the following terms have the meanings that they have in the Agreement (see Article 1)—
“areas beyond national jurisdiction”, and 10
“marine genetic resources”.

PART 2

MARINE GENETIC RESOURCES

Provision of information

2 Collection 15

- (1) This section applies in relation to a project (a “collection project”) in which a UK craft is used to collect marine genetic resources in an area beyond national jurisdiction.

- (2) The relevant person in relation to the collection project must ensure that no marine genetic resources are collected for the purposes of the project unless –
 - (a) the information described in paragraphs (a) to (j) of Article 12(2) of the Agreement (pre-collection information) has been given to the Secretary of State, and 5
 - (b) subject to subsection (3), a period of at least 7 months has passed, beginning with the day (or the last day) on which that information was given to the Secretary of State.
- (3) The Secretary of State may, by notice in writing given to the relevant person, reduce the period mentioned in subsection (2)(b) where the Secretary of State considers that there is a compelling reason for marine genetic resources to be collected as part of the project despite less than 7 months having passed since the information was given to the Secretary of State. 10
- (4) The relevant person must ensure that the information described in paragraphs (a) to (d) of Article 12(5) of the Agreement (post-collection information) is given to the Secretary of State – 15
 - (a) as soon as it is all available, and
 - (b) in any case, before the end of the period of 11 months beginning with the last day on which marine genetic resources are collected in an area beyond national jurisdiction as part of the project. 20
- (5) In this section –
 - “collect”, in relation to marine genetic resources, means collecting or sampling such resources other than incidentally when carrying out an activity for another purpose;
 - “the relevant person”, in relation to a collection project, is the individual with principal responsibility for the scientific or technical aspects of the project so far as it concerns marine genetic resources. 25

3 Utilisation

- (1) This section applies in relation to a project (a “utilisation project”) involving the utilisation in the United Kingdom of – 30
 - (a) marine genetic resources of areas beyond national jurisdiction, or
 - (b) digital sequence information on such resources.
- (2) The person who controls the utilisation project (“the relevant person”) must ensure that information is given to the Secretary of State in accordance with the Schedule. 35
- (3) The relevant person must ensure that samples of any marine genetic resources the utilisation of which falls within subsection (1)(a) are deposited in a suitable repository.
- (4) The relevant person must ensure that any digital sequence information the utilisation of which falls within subsection (1)(b) is recorded in a suitable database. 40

- (5) The relevant person must comply with subsection (3) or (4) within the period of 3 years beginning with the day on which the utilisation project begins.
